

## Terms and Conditions For Summer School Awards

1. The award is for current registered undergraduate students of the Faculty of Engineering and Physical Sciences at the point of the programme application.
2. £500 will be awarded in support of a European summer school and £1000 will be awarded in support of an International summer school. The award can contribute to tuition fees, travel, accommodation and expenses. European destinations are those countries who are in the EU or EEA, including Switzerland as defined by the UK Government. Countries on this list can be viewed [here](#). International destinations are any country not on the above list.
3. Students may apply for all opportunities available through Jetset 2025, however, only one application will be successful. Awards cannot be transferred to Partner Programmes, so students should apply for both if interested. If a student submits multiple applications, they must email [askeps@qub.ac.uk](mailto:askeps@qub.ac.uk) to confirm their preferred order of choice.
4. The award will be made to fund an on campus international summer school which must take place outside of the UK/ROI between 1<sup>st</sup> June and 31<sup>st</sup> August 2025 (the departure date must be within these dates and it must start no later than 3 months after the student's graduation date if they are a final year student).
5. The school must provide approval of the chosen summer school programme upon reviewing applications. If approval is not provided by the school for the chosen summer school programme, the student will have the opportunity to choose a different summer school
6. Students must be in good academic standing. If a student needs to be in Belfast to undertake a failed exam then this takes priority and hence the student must cancel their trip and return the scholarship to the faculty. Students need to therefore make sure that their flights etc. allow for, or are insured against, such a case.
7. Students are not eligible if they have previously taken part in any international opportunities within the University including summer schools, short-term study exchanges or international work placements. This includes any scholarships provided by Global Opportunities. Checks will be made and applications will be withdrawn if students have been receipt of any other scholarship relating to international opportunities.
8. Students must complete an application form and answer three short questions. Applications will be assessed by the schools and will be scored out of 30. The highest scoring students will be offered the award. A reserve list will be in place, and if additional funds become available, more places may be offered. In the result of a tie, academic standing will be considered.
9. Upon a successful application, students should complete the application process with the chosen university.
10. To claim the funding, students must provide evidence of successful application at the chosen summer school. Evidence may include an email from the university hosting the summer school, course acceptance form or an academic approval letter.

11. Payment of the award will be made via QSIS bank transfer. You will be required to update your bank details on your QSIS account. Once you have been notified of successful application, you will be emailed instruction about the payment via QSIS.
12. It is the student's responsibility to book all travel and ensure they meet the travel entry requirements set out by the Government of the Country they are choosing to join a summer school. This includes fulfilment of any visa or other entry requirements of the host country. If a visa is required, it is extremely important that students begin the application process at the earliest possible opportunity.
13. Satisfactory completion of a Student International Travel Risk Assessment form. Further information and a copy of the form can be found here: <https://www.qub.ac.uk/directorates/sgc/careers/GlobalOpportunities/Covid19Update/>
14. All recipients of this award must supply either a report of their trip or a video blog to the Faculty of EPS within four weeks of their return. Photographs of the trip will be welcomed and can include selfies along with photographs of work undertaken. A selection of travel reports/video blogs may be used as publicity material for future student mobility programmes or student recruitment purposes; however, the relevant authors will be asked in advance for permission.
15. If a student provides the University with incorrect or incomplete information, or if they fail to complete the activity or they do not meet the eligibility criteria for an award, the University, may terminate its agreement and will not pay any money to the student. If the money has already been provided, the university may require the student to return any money already paid.
16. The University takes no responsibility for undertaking health and safety or any other risk assessments of summer school organisations. Students participating in a summer school as part of this Scheme are expected to undertake their own assessments and familiarise themselves with the relevant organisation's processes to ensure their personal safety and wellbeing.
17. You must not be in receipt of any other subsidy/bursary for this activity to be eligible. This includes, but is not restricted to, Erasmus/Turing funding and Travel scholarships that are awarded by the University's Student Scholarships and Awards Group. Checks will be made, and applications will be withdrawn if you have been in receipt of any other subsidy/ bursary relating to this activity.
18. You shall be responsible for declaring any award received as income to H&M Revenue and Customs and to pay income tax and national insurance contributions and other applicable deductions required under applicable law. It is your responsibility to ensure you remain within the law. The University accepts no liability for such matters.
19. Data held by the Faculty of Engineering and Physical Sciences Office will be processed in accordance with the University's Data Protection Policy and your rights under Data Protection Legislation. It will be used to process your application and to communicate with you prior, during and after the award. You can view the Student Privacy Notice for more information.
