

The Catherine Buchanan SCHOLARSHIPS

SCHOOL OF MATHEMATICS AND PHYSICS

The Catherine Buchanan SCHOLARSHIPS

These Scholarships were established in 2019 in memory of Catherine Buchanan to **both inspire and support female physics students** in the School of Mathematics and Physics. The Scholarships aim to advance the representation of women in science and enable progression to either MSci or PhD Physics. Catherine Buchanan was a student at Strathearn School (Belfast), where she excelled at her A Level studies. Inspired by a visit to Armagh Observatory, she was planning to embark on a career as a scientist in the fields of physics and astronomy. However, just as she had finished her university application, Catherine developed a very rare and aggressive form of blood cancer and only one week after her diagnosis she sadly passed away on 21 September 2013, with her family by her side.

Catherine had a tremendous passion for science and wanted to make a difference in life. She was an outstanding individual just setting out in the world, and it is fitting that this scholarship has been established in her memory to encourage other young women to fulfil their potential and to pursue studies in physics and astronomy. A degree in physics requires a huge amount of hard work and perseverance to complete. The award aims to relieve the financial pressure that some female students have, and thereby encourage them to pursue their studies. It also aims to reward those female students who, despite financial pressure, are able to excel in their studies.

Three scholarships of £2,000 will be awarded to the top ranked full-time BSc / MSci /MPhys (female) Physics students in each stage 1, 2 and 3.

Through this partnership with Mr and Mrs Buchanan, we are honoured to be able to offer these scholarships and assist with the advancement of females within Physics.

RECIPIENTS AND TESTIMONIALS

2023/24

Emily Moran Sinéad O'Donnell Leah Donnelly

2022/23

Abbey McNally Leah Donnelly Amy Davis

2021/22

Leah Donnelly Laura McWilliams Ciara Ward

2020/21

Hannah Jager Amy Davis Ciara Ward Lindsey Lynch

2019/20

Alicia Kerr Lindsey Lynch Sarah Gregg

2018/19

Sarah Gregg Lindsey Lynch Lydia Gardiner

I am so grateful to have been awarded the Catherine Buchanan Scholarship for Level 1 and would like to extend my immeasurable gratitude to Mr and Mrs Buchanan for their immense generosity.

The story of Catherine has truly moved both me and my family and I am so privileged to be able to share her story with others.

This award will help me tremendously this year, allowing me to focus solely on my Physics degree by alleviating some of the financial pressures associated with studying at university. It has also helped me to become more confident in my abilities and has reinforced that my dedication to my studies is paying off.

I once again want to thank Mr and Mrs Buchanan for this generous gift, it truly is making a big difference to my studies of Physics at university. Emily Moran

I am extremely honoured to receive the Catherine Buchanan Scholarship in 2024. This award not only alleviates the financial pressures of university life but also fills me with inspiration and

motivation to excel in my field. Catherine's story, and her remarkable passion for physics, serves as a powerful example for young women like myself pursuing careers in STEM.

I extend my heartfelt thanks to Mr and Mrs Buchanan for their generosity in honouring their daughter through this scholarship. Their support has given me the confidence to transition to the master's course with the hope of pursuing a career in medical physics. As a result of this award, Catherine's story will now be a part of my story. Sinéad O'Donnell

To be awarded the Catherine Buchanan scholarship for the third time in 2024 means so much to me. It has been so lovely to get to know the Buchanan's and hear their story along with their daughter's. Their

constant and sincere generosity is so admirable and really reflects the lovely people that they are.

I am so grateful for the financial relief I have gained with this award, and it has motivated me so much to continue pushing myself within my degree. I have loved my time at Queen's, and I would not have had the same experience without the scholarship.

I'd like to thank Mr and Mrs Buchanan for everything they do, and I hope Catherine's story continues to inspire young women in physics the same way it has inspired me. Leah Donnelly

I am so honoured and grateful to have been awarded the Catherine Buchanan scholarship this year for my first year at Queen's University.

I have always been passionate about physics and am excited about my future in a career in STEM. I would like the thank Catherine's family for their generosity and for honouring her in such a positive way. Abbey McNally

I am extremely honoured to have been awarded the Catherine Buchanan Scholarship in both 2021 and 2023.

This award has been a welcome boost of confidence as I enter

my final year. It inspires me to continue working hard and allows me to focus on my studies without the distraction of financial worries.

I would like to thank the Buchanan family for their generosity and for their support to me and other women in STEM. Amy Davis

I feel both honoured and humbled to receive the Catherine Buchanan award this year and send my deepest thanks to the Buchanan family for providing me and other women in STEM with this support and recognition

in memory of their talented daughter. This award will be a significant help during my Erasmus year, especially in the current climate of escalating prices, and will enable me to progress in my studies with less of the financial concerns that can arise when living in another country.

I am immensely grateful to Richard and Julie Buchanan for this generous gift that will give me and other women the motivation to pursue a future in STEM. Laura McWilliams I am honoured to have been awarded the Catherine Buchanan Scholarship in 2021 and 2022. I have really enjoyed my course so far and being awarded this scholarship has given me more confidence throughout my studies. It has encouraged me to stay motivated and to put my best effort into my work.

The scholarship has reduced any financial stress at university making it easier to focus on and enjoy my studies. I would like to thank Mr and Mrs Buchanan for their generosity, which has greatly helped me in achieving my academic goals. Ciara Ward

Words can't describe how honoured I was receiving the Catherine Buchanan scholarship in 2021, especially after learning about the amazing young woman it is in memory of. The scholarship has

helped to alleviate many of my financial worries- it has allowed me put some money away for my future and invest in a new laptop for my university work. Alongside this, I was able to reduce my hours at my part-time job, allowing me to dedicate more time to my studies. It has inspired me to continue to put my best foot forward and work hard at all of my assignments and exams, boosting my confidence in abilities and my passion for physics.

It has also made me aware of the support for women and girls in physics and has encouraged me to further pursue my education -earlier this year I accepted an offer to transfer from the Physics BSCi to the MSci. All going well, I am considering studying for PhD in quantum or particle physics in the future. I am forever grateful to the Buchanan family for their generosity in honouring their daughter. Catherine's story will continue to inspire young women in STEM for years to come. Hannah Jager

It was an honour and privilege to accept the Catherine Buchanan scholarship for the third time in 2021. Facing the workload and pressure of my final year was daunting but receiving this

scholarship was a tremendous encouragement. The financial relief I was given allowed me to focus wholly on my master's project, where, through my time in the lab and during the process of writing my thesis and analysing results, I found a new appreciation for my subject and the current advancements being made.

I really hope to make my own mark on academia as I pursue a PhD in solid state physics this year. I want to extend my sincere thanks to Catherine's family for their generosity and kindness. Lindsav Lynch

Being in a woman in STEM brings unique challenges not faced by men in the field. Throughout my life I have always been interested in physics and studying it further. This past year has been particularly difficult for me, and this scholarship has allowed me to afford to spend my time focussing on studies and my own health.

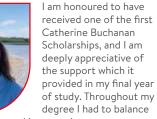

Thanks to this I have been able to continue to achieve my academic goals and prepare for the rest of my degree life. I am very grateful to the Buchanan family and their generous donation that has helped me tremendously. Alicia Kerr

I feel very blessed and honoured to have been awarded the Catherine Buchanan Scholarship in 2019 and 2020. This award has had a great impact on my confidence and motivation throughout

the final two years of my undergraduate degree. It has inspired me to work towards my academic goals and having completed my degree. I now plan to pursue a PhD in quantum physics. Furthermore, this generous investment has been a massive relief from the financial pressures of university. I would like to express my deepest gratitude to Richard and Julie Buchanan for their incredible generosity, which has left a lasting impression on my career.

Sarah Gregg

my studies with working part time to support myself financially. This Scholarship helped to reduce the financial pressure during my final vear, allowing me to work fewer hours and focus on my studies, which was a significant help during such an important time in my education.

Being awarded this Scholarship also encouraged me to pursue further study and research after completing my undergraduate studies. I have always been passionate about applying physics to medicine, in particular to cancer research, and I am looking forward to starting a PhD later this year where I will be focusing on radiation therapy research. I would like to thank Richard and Julie Buchanan for their thoughtful and generous support, which has helped me reach my academic goals. Lydia Gardner
