WELCOME TO THE SCHOOL OF PSYCHOLOGY

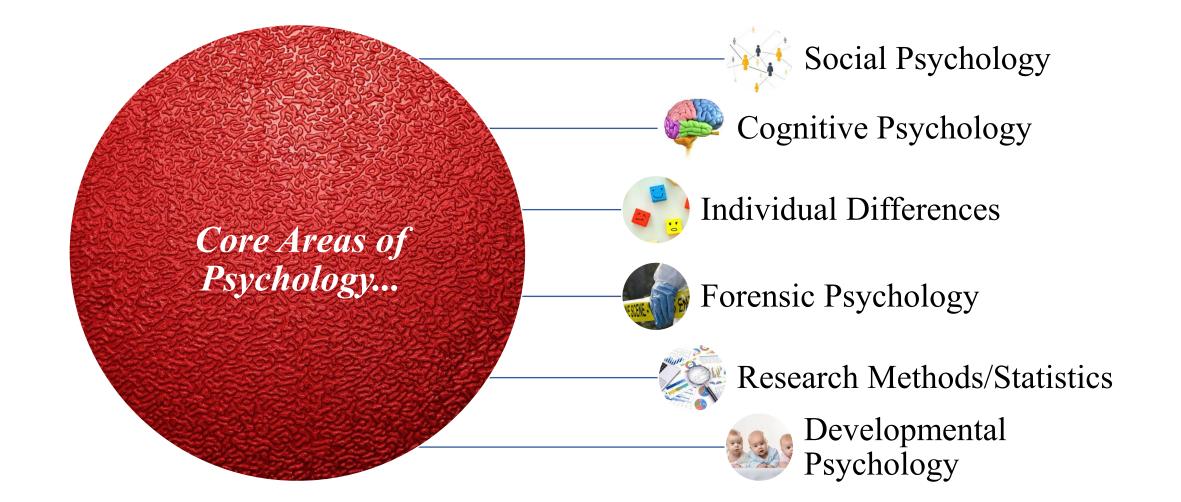

Subject Talk Overview

- What is Psychology?
- Psychology in Action
- Studying Psychology at QUB
- Professional Skills in Psychology
- A Taste of Psychology Research

What is Psychology

"Psychology is the scientific study of the mind and how it dictates and influences our behaviour, from communication and memory to thought and emotion. It's about understanding what makes people tick and how this understanding can help us address many of the problems and issues in society today." (British Psychological Society, 2021)

The Science Behind Behaviour

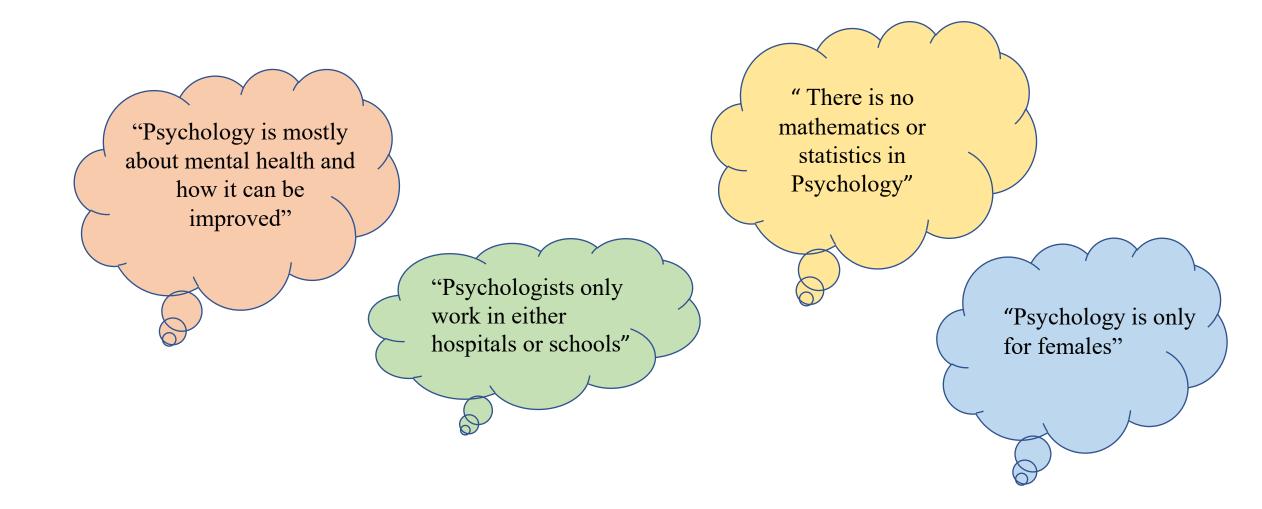

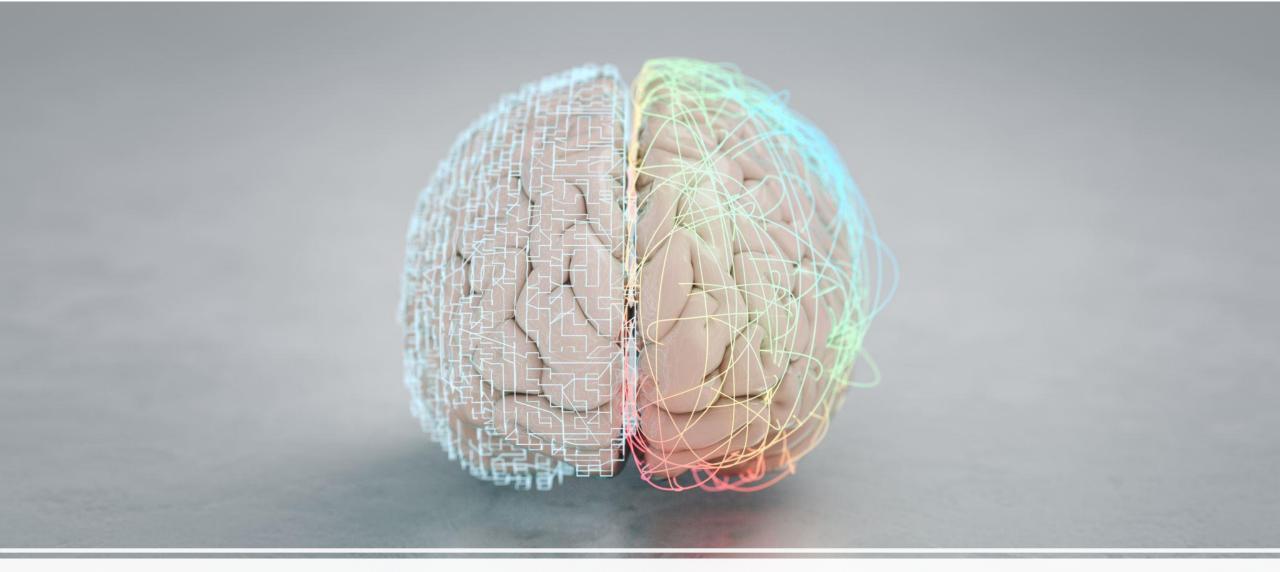

Did you know...

- Psychology is a Science?
- Psychology uses a scientific approach to studying human behaviour.
- A scientific approach means that we state a question (hypothesis), offer a theory in support of this hypothesis, and construct experiments to test this hypothesis.
- Psychologists apply what we have learned through research to understand human behaviour.

Some misconceptions about Psychology

Psychology in Action

Where has Psychology been in action around you today?
